ENGLISH 6 · VOCABULARY & READING PACK

Theme 8

Life in the Universe & Future

Planets and the Earth as a planet | Life on Earth in the future

WHAT'S INSIDE

- Aa **Vocabulary** — 65 words with meanings & examples
- " " **Everyday expressions** — 6 phrases from the theme
- 1 **The Night Mustafa Saw a UFO** — Blog post
- 2 **Chasing the Weather: Meet Dr Kaya** — Magazine interview
- 3 **Türkiye Reaches for the Stars** — CLIL article (Science & Culture)
- 4 **Our City in 2070** — Comic-strip dialogue
- ✓ **Answer key** — check your answers at the end

GRAMMAR YOU WILL MEET

- **be going to – plans and intentions**
- **be going to – predictions from what we can see now (present evidence)**
- **will / won't – predictions and beliefs about the future**
- **Question tags with will / be going to – checking information or asking for agreement**

Examples: see "Grammar spotlight" after the word list.

HOW TO USE THIS PACK

1. **Words first.** Read each card aloud. Then cover the meaning and test yourself. Tick the small box on the cards you know.
2. **Warm up.** Before each text, think about the "Before you read" question for one minute.
3. **Read twice.** First read quickly for the main idea, then read slowly for the details.
4. **Do the tasks** without looking at the answer key. Check your answers at the end and read the text again for the ones you missed.

Name: _____ Class: _____ Date: _____

PART 1

Vocabulary

n = noun · **v** = verb · **adj** = adjective · **adv** = adverb · **prep** = preposition · **phr v** = phrasal verb · **phr** = phrase

Space & the Universe

21 words

alive — adj

living; not dead

> Dinosaurs aren't **alive** today, but Mustafa still talks about them every day!

astronaut — n

a person who travels and works in space

> Kerem says he is going to be the first **astronaut** from our school!

atmosphere — n

the mix of gases around a planet, like the air around the Earth

> Mars has a very thin **atmosphere**, so people can't breathe there.

be composed of — phr

to be made of two or more different parts or things

> Our solar system model **is composed of** nine balls: one Sun and eight planets.

bright — adj

full of light or shining strongly

> Venus is so **bright** that people sometimes think it's a star.

close — adj

not far away; near

> Uncle Cem's farm is **close** to Konya, but the sky there is very dark.

distance — n

the length of the space between two places or things

> Light from the Sun travels a huge **distance** to reach the Earth.

exist — v

to be real or to be there in the world

> Do aliens really **exist**? Kerem is sure they do!

far — adj

a long way away from a place

> Neptune is so **far** from the Sun that it is extremely cold.

galaxy — n

a very large group of stars, gas and dust in space

> Our **galaxy** is called the Milky Way, and the Sun is one of its stars.

large — adj

big in size or amount

> Jupiter is so **large** that all the other planets can fit inside it.

light — n

the energy from the Sun or a lamp that lets us see things

> **Light** from the Sun takes about eight minutes to reach the Earth.

orbit (n)

a path that a planet, moon or spaceship follows around something

> The Earth takes one year to complete its **orbit** around the Sun.

planet (n)

a large round object in space that moves around a star

> Which **planet** is your favourite? Maya loves Saturn because of its rings.

rocket (n)

a vehicle shaped like a tube that flies up into space

> Look at all that smoke! The **rocket** is going to take off!

scientist (n)

a person whose job is to study the natural world and do experiments

> **Scientists** think people will visit Mars one day.

solar system (n)

the Sun and all the planets and objects that travel around it

> There are eight planets in our **solar system**.

space station (n)

a big home and laboratory above the Earth where astronauts live and work

> Astronauts from many countries live and work together on the **space station**.

telescope (n)

a tool that makes things that are far away look bigger and closer

> Emre is going to photograph the Moon through Uncle Cem's **telescope** tonight.

universe (n)

everything that exists: all the stars, planets and galaxies

> Nobody knows exactly how big the **universe** is.

visible (adj)

that can be seen

> On clear nights, many more stars are **visible** in the village sky.

Weather & Extreme Weather

12 words

blizzard (n)

a storm with a lot of snow and very strong winds

> The news says a **blizzard** is coming, so we're going to stay at home.

drought (n)

a long time with very little or no rain

> There was no rain all summer, so the village had a terrible **drought**.

extremely (adv)

very, very; much more than usual

> Antarctica is **extremely** cold, even in summer.

flood (n)

a lot of water that covers land that is usually dry

> After three days of heavy rain, there was a **flood** in the town centre.

freezing (adj)

very, very cold

> "It's **freezing** outside, Mustafa! Wear your hat," says Mum.

hurricane (n)

a huge storm with very strong winds that starts over a warm sea

> Experts say the **hurricane** won't reach the island, luckily.

lightning (n)

sudden bright flashes of light in the sky during a storm

> Pamuk hides under the bed when she sees **lightning**.

storm (n)

a time of very bad weather with strong winds and heavy rain or snow

> The sky is getting darker and the wind is stronger. A **storm** is going to start!

stormy (adj)

with strong winds, heavy rain and sometimes thunder

> It's a **stormy** day, so Emre's basketball match isn't going to be outside.

thunder (n)

the loud noise in the sky that you hear during a storm

> Mustafa covers his ears every time he hears **thunder**.

thunderstorm (n)

a time of heavy rain with lightning and loud noise in the sky

> Maya's football match stopped because of a sudden **thunderstorm**.

tornado (n)

a very strong wind that turns round and round very fast and moves across land

> Storm chasers follow **tornadoes** to film them and learn about them.

Life in the Future

21 words

development (n)

growth or change that makes something bigger, better or more modern

> Clean energy is very important for the **development** of our country.

eco-city (n)

a city that is planned to be green, clean and good for nature

> In an **eco-city**, people will ride bikes and use electric buses.

electric car (n)

a car with a battery that you charge, not one that uses petrol

> Dad is going to buy an **electric car** next year. He's saving money now.

experience (n)

something that happens to you, or the skill you learn by doing things

> The planetarium show at the Konya Science Centre was an amazing **experience**.

expert (n)

a person who knows a lot about a subject

> Dad is an AI **expert** – he teaches AI in cities all over Türkiye.

factory (n)

a building where people and machines make things

> In the future, robots will do most of the jobs in **factories**.

flying (adj)

that can move through the air

> Will we go to school in **flying** cars in 2070?

invent (v)

to make or design something new for the first time

> Elif wants to **invent** a machine that tidies her room. Mustafa loves the idea!

knowledge (n)

the information and understanding that you have about something

> Reading science books gives you a lot of **knowledge** about space.

land (n)

the part of the Earth that is not covered by sea

> Most of the Earth is covered by water, not **land**.

nature (n)

plants, animals, rivers and everything in the world not made by people

> Elif loves drawing birds and flowers when she is out in **nature**.

peace (n)

a time when there is no war or fighting

> I hope all the people in the world will live in **peace** one day.

population (n)

the number of people who live in a place

> The **population** of the world is getting bigger every year.

robot (n)

a machine that can move and do jobs without help from people

> Kerem's **robot** can draw a circle, but it can't do his homework!

roof farm (n)

a garden on top of a building where people grow vegetables and fruit

> Our school is going to have a **roof farm** with tomatoes and peppers.

run out (phr v)

to have none left because you used all of it

> Oil and coal will **run out** one day, so we need clean energy.

smart house (n)

a house where computers control the lights, heating and doors

> In a **smart house**, the lights will turn on when you say “Hello!”

solar panel (n)

a flat board that makes electricity from sunlight

> There are **solar panels** on our roof, so we use the Sun's energy.

solar power (n)

electricity or energy that we make from sunlight

> Many buses in eco-cities will run on **solar power**.

source (n)

a place or thing that something comes from

> The Sun is the most important **source** of energy for life on Earth.

technology (n)

new machines, tools and ideas that come from science

> **Technology** will change our lessons in the future, won't it?

Plans, Hopes & Predictions

11 words

evidence (n)

facts or signs that show something is true

> Scientists found **evidence** of ice on Mars.

expect (v)

to think or believe that something will happen

> We **expect** sunny weather for our school trip on Friday.

following (adj)

next; coming after the one you talked about

> We visited the planetarium on Monday and wrote our reports the **following** day.

goal (n)

something that you want to do or get in the future

> My **goal** is to finish my science project by Friday.

hope (n)

a feeling that something good will happen

> Elif's poster is full of **hope**: green parks, blue skies and happy people.

hope (v)

to want something to happen and think it is possible

> Mum **hopes** it won't rain tomorrow – we're going to have a family picnic!

intention (n)

a plan or idea of what you are going to do

> Our **intention** is to plant twenty trees in the school garden this year.

possibility (n)

something that might happen or might be true

> Is there a **possibility** of snow tomorrow? Mustafa really wants a snow day!

predict (v)

to say that something will happen before it happens

> Can you **predict** who will win the football match tonight?

purpose (n)

the reason why you do or make something

> The **purpose** of our project is to show how people will live in 2070.

suppose (v)

to think that something is probably true

> I **suppose** robots will do the cleaning in every house one day.

Everyday expressions

say it like a native speaker

"a bright future"

a happy and successful time in the years ahead

> With clean energy, our planet will have **a bright future**, won't it?

"take care of"

to look after someone or something and keep them safe and well

> Let's **take care of** our school garden. Who's going to water the plants?

“a glimpse of”

a quick look at something, or a short idea of what it is like

> The planetarium show gave us **a glimpse of** life on a space station.

“tomorrow’s world”

the world in the future; how life will be one day

> Robots and electric cars will be normal in **tomorrow’s world**.

“I hope so. / I hope not.”

short answers when you want (so) or don’t want (not) something to happen

> “Will it rain at the picnic?” “**I hope not!**”

“I can’t wait to …”

you are very excited about something that is going to happen

> **I can’t wait to** see Saturn’s rings through the telescope!

Our solar system

Eight planets travel around the Sun. The Moon is not a planet: it travels around the Earth.

Name	Fun fact
the Sun	It is a star, not a planet. It gives us light and heat.
Mercury	It is the smallest planet and the closest planet to the Sun.
Venus	It is the hottest planet – even hotter than Mercury!
Earth	It is the only planet we know with life. Most of it is covered by water.
Mars	People call it the Red Planet because of its red dust and rocks.
Jupiter	It is the largest planet. It has a giant storm called the Great Red Spot.
Saturn	It has bright, beautiful rings made of ice and rock.
Uranus	It spins on its side, like a ball rolling around the Sun.
Neptune	It is the farthest planet from the Sun and extremely windy.
the Moon	It goes around the Earth. Astronauts first walked on it in 1969.

Grammar spotlight

the grammar you will see in the texts

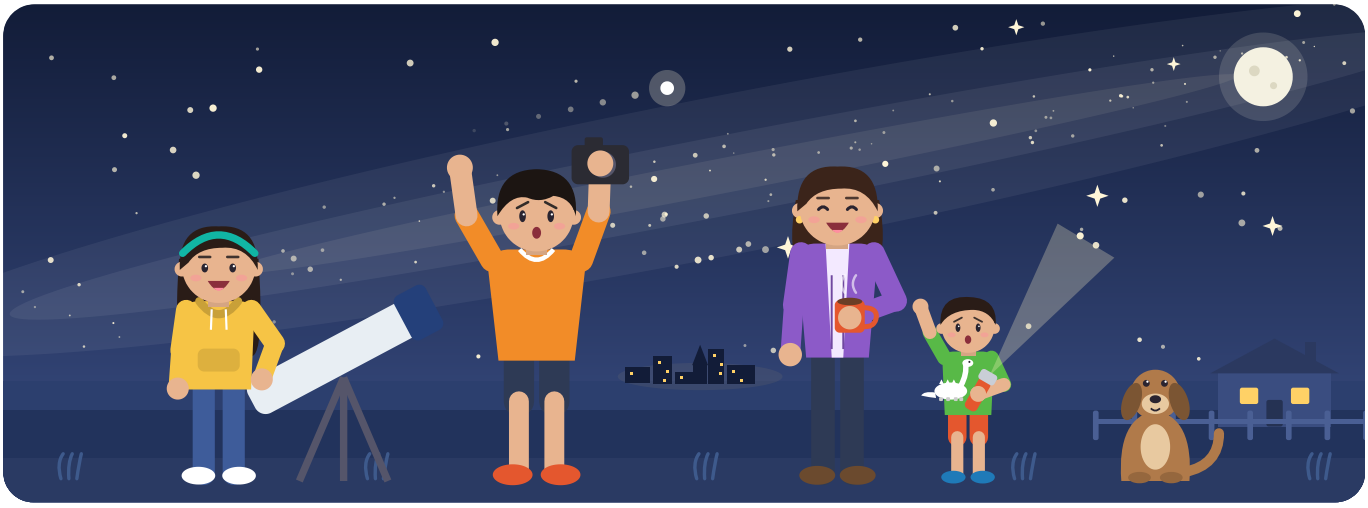

be going to – plans and intentions	We are going to visit the planetarium on Saturday.
be going to – predictions from what we can see now (present evidence)	Look at that lightning! There's going to be a thunderstorm.
will / won't – predictions and beliefs about the future	I think robots will help us at home, but they won't go to school for us!
Question tags with will / be going to – checking information or asking for agreement	You'll join our team, won't you? It won't rain, will it? We're going to win, aren't we?

The Night Mustafa Saw a UFO

Linked to: Student's Book p. 130 – Sami wonders about the universe

BEFORE YOU READ Do you like looking at the night sky? What can you see there?

> Elif's Notebook · Young Space Explorers Weekend, Konya

Hi, everyone! Greetings from Konya! Mum, Dad, Emre, Mustafa and I are here for the Young Space Explorers weekend at the Konya Science Centre, and we're staying at Uncle Cem's farm outside the city. Uncle Cem loves astronomy and has a big **telescope**. The farm isn't **far** from Konya, but its sky is very dark, so more stars are **visible**.

Last night, we looked at the Moon. It was so **bright** that I had to close one eye! Then Uncle Cem showed us Saturn. I could see its rings – tiny, but real! I screamed so loudly that Mum spilled her hot chocolate!

Uncle Cem told us amazing facts. Our Sun is just one star in the Milky Way, and the Milky Way **is composed of** billions of stars. And there are billions of **galaxies** in the **universe**! I asked him, "Is anything **alive** out there? Do aliens **exist**?" He smiled. "Nobody knows yet. But I **suppose** scientists will find the answer one day."

At ten o'clock, the big surprise came. Mustafa pointed at the sky and shouted, "Look! A UFO! It's going to land on the farm!" A bright light was moving fast across the sky, with no sound. Emre grabbed his camera, and Mustafa hid behind Mum.

Uncle Cem laughed. "That's not a spaceship, Mustafa. It's the International **Space Station**! **Astronauts** live and work on it, and it goes around the Earth about every

hour and a half." Mustafa looked disappointed, but then he waved. "They're going to see my torch!" he said, and turned it on and off ten times.

Now I have a new **goal**: I'm going to save my pocket money and buy a small telescope. Maybe I'll discover a new planet. I'll call it Pamuk! You'll come stargazing with me next time, won't you?

Keep looking up! Elif (P.S. Pamuk is staying with Maya in Antalya. I miss her!)

Let's check!

My score: _____ / 17

1 True or False? Write T (True) or F (False). Correct the false sentences.

a Uncle Cem's farm is in the centre of Konya. T F

b More stars are visible at the farm because the sky is very dark. T F

c Elif saw the rings of Jupiter through the telescope. T F

d Uncle Cem is sure that aliens exist. T F

e Emre took his camera when he saw the bright light. T F

f Elif's mum stayed at home in Antalya with Pamuk. T F

2 Choose the correct answer Circle a, b or c.

1 What did the family look at first?
(a) Saturn (b) the Moon (c) the Space Station

2 The bright moving light in the sky was…
(a) a UFO (b) a plane (c) the International Space Station

3 Why did Mustafa turn his torch on and off?
(a) He wanted the astronauts to see it. (b) His torch was broken.
(c) He wanted to scare Emre.

3 Answer the questions Write full answers.

a Why are Elif and her family in Konya?

b What is the Milky Way composed of?

c What did Mustafa think the bright light was?

d What is Elif's new goal?

4 **Word detective** Find words in the text that mean:

a a tool that makes things far away look bigger and closer

b full of light; shining strongly

c everything in space: all the stars, planets and galaxies

d people who travel and work in space

5 **Think & Share** Write your own answers.

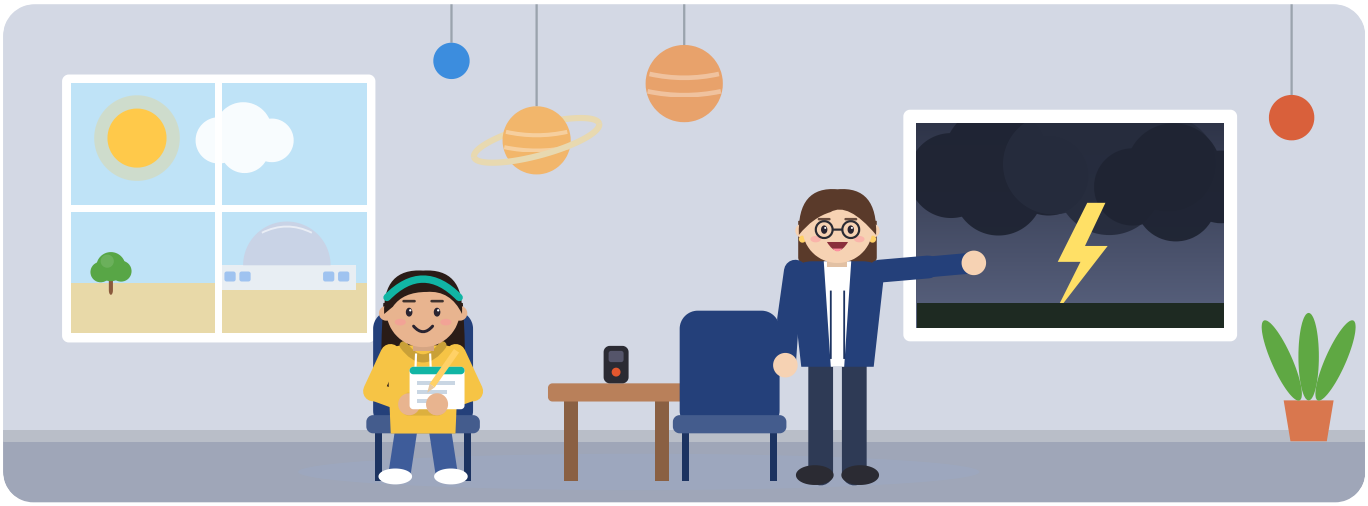

a Imagine you discover a new planet. What are you going to call it? Why?

b Do you think there is life on other planets? Why / Why not?

READING 2 MAGAZINE INTERVIEW ≈ 295 words · 3 min

Chasing the Weather: Meet Dr Kaya

Linked to: Student's Book p. 131 – Uzay finds pictures of extreme weather

BEFORE YOU READ What is the worst weather you remember? What happened?

> Turunç Times · School Magazine · Science Corner
> Interview by Elif Yıldız, 6-B

At the Young Space Explorers weekend in the Konya Science Centre, I met Dr Defne Kaya, a weather **expert**. She studied storms in the USA for five years.

Elif Dr Kaya, thank you for coming! What exactly do you do?

Dr Kaya I'm a weather scientist. I study clouds, wind and rain, and I **predict** the weather. In the USA, I also chased **tornadoes**. The USA has more tornadoes than any other country in the world.

Elif You chased tornadoes? Wasn't that dangerous?

Dr Kaya We were always careful. Our team stayed at a safe **distance** and used cameras and computers to learn about each storm.

Elif How do you know when a storm is going to start?

Dr Kaya We look for **evidence**. When huge dark clouds grow very fast and the air feels hot and wet, I say, "OK, a **thunderstorm** is going to start soon!"

Elif My cat Pamuk hides under the bed when she hears **thunder**. Is thunder dangerous?

Dr Kaya No, thunder is just the sound of **lightning**. Lightning is the dangerous part. It's **extremely** hot – hotter than the surface of the Sun! Here's a trick: when you see lightning, count the seconds until you hear the thunder. Every three seconds means the storm is about one kilometre away.

Elif Cool! And what about **hurricanes**?

Dr Kaya Hurricanes start over warm seas. They bring very strong winds and heavy rain, and sometimes **floods**.

Elif Will we have more extreme weather in the future?

Dr Kaya Experts **expect** more heatwaves, **droughts** and floods because the Earth is getting warmer. Here on the dry Konya Plain, farmers already worry about water. But we can all help: we can save energy and water, and we can plant trees.

Elif Last question: you won't chase tornadoes again, will you?

Dr Kaya Ha! Never say never! But my favourite weather is sunny and calm, like today!

Let's check!

My score: _____ / 13

1 Choose the correct answer Circle a, b or c.

1 What is Dr Kaya's job?
(a) She is a weather scientist. (b) She is a science teacher. (c) She is a pilot.

2 Which country has the most tornadoes in the world?
(a) Türkiye (b) the USA (c) England

3 Thunder is…
(a) more dangerous than lightning. (b) the sound of lightning.
(c) a kind of hurricane.

4 Where do hurricanes start?
(a) over high mountains (b) in dry deserts (c) over warm seas

2 Answer the questions Write full answers.

a How did Dr Kaya's team stay safe near tornadoes?

.....

.....

b What evidence tells Dr Kaya that a thunderstorm is going to start?

.....

.....

c You see lightning and hear thunder six seconds later. How far away is the storm?

d Why do farmers on the Konya Plain worry about water?

3 **Complete the sentences** Use the words in the box. There is one extra word.

drought	blizzard	lightning	flood	tornado	hurricane

a There was no rain for six months, so the farmers had a terrible _____ .

b It's snowing heavily and the wind is very strong. It's a real _____ !

c The river is too full of water. There's going to be a _____ in the village.

d Pamuk is scared of the bright _____ in the sky.

e A _____ is a very strong wind that turns round and round very fast.

4 **Think & Share** Write your own answers.

a Would you like to be a storm chaser? Why / Why not?

b What is the weather like in your town today? What is it going to be like tomorrow?

READING 3 CLIL ARTICLE (SCIENCE & CULTURE) ≈ 297 words · 3 min

Türkiye Reaches for the Stars

Linked to: Student's Book p. 136 – Ready to Explore: the ISS, Alper Gezeravcı and space cargo ships

BEFORE YOU READ Do you know the names of any astronauts? What do astronauts do in space?

> Turunç Times · School Magazine · Space Special
> by Elif Yıldız, 6-B

Have you ever dreamed about travelling to space? At the Young Space Explorers weekend in Konya, I learnt about Türkiye's first astronauts. In 2024, a big dream came true for Türkiye – not once, but twice!

In January 2024, Alper Gezeravcı became the first Turkish **astronaut**. Before that, he was a pilot in the Turkish Air Force. He flew to space on a **rocket** from the USA and stayed on the International **Space Station** (ISS) with astronauts from other countries. There, he did science experiments for Turkish **scientists**. What an **experience**!

Life on the ISS is very different from life on Earth. The station is very **large** – about the size of a football pitch. It is always in **orbit** around our **planet**, and it goes around the Earth about every hour and a half. So astronauts see many sunrises and sunsets every day! Everything floats inside, so astronauts sleep in sleeping bags on the walls. They also exercise for about two hours every day to keep their muscles and bones strong. Cargo ships bring them food, water and equipment. And the ISS is so **bright** that it is **visible** from the ground at night, without a telescope!

In June 2024, Tuva Cihangir Atasever became Türkiye's second astronaut. His trip was different. He flew on a spaceplane and he didn't go to the ISS. The spaceplane

went up to space and came back down on the same day. For a few minutes, Atasever floated and looked down at our blue planet.

What will the future bring? Many countries are planning trips to the Moon, and space **technology** is getting better every year. Maybe people will live and work on the Moon one day. And maybe the next Turkish astronaut is reading my article right now. It's going to be you, isn't it?

Let's check!

My score: _____ / 14

1 **True or False?** Write T (True) or F (False). Correct the false sentences.

a Alper Gezeravcı was a pilot before he became an astronaut. T F

b Gezeravcı flew to space on a rocket from Türkiye. T F

c The ISS goes around the Earth once a day. T F

d Astronauts on the ISS sleep in sleeping bags on the walls. T F

e You need a telescope to see the ISS from the ground. T F

f Tuva Cihangir Atasever stayed on the ISS for a long time. T F

2 **Answer the questions** Write full answers.

a When did Türkiye's dream of space travel come true?

b Why do astronauts on the ISS see many sunrises every day?

c Why do astronauts exercise every day?

d How was Atasever's trip different from Gezeravcı's trip?

3 **Word detective** Find words in the text that mean:

a a person who travels and works in space .....

b a path that something follows around a planet or star .....

c that can be seen .....

d big in size .....

4 **Think & Share** Write your own answers.

a Would you like to live on the ISS for a few months? Why / Why not?

.....

.....

.....

b Imagine you are going to travel to space. What three things are you going to take with you? Why?

.....

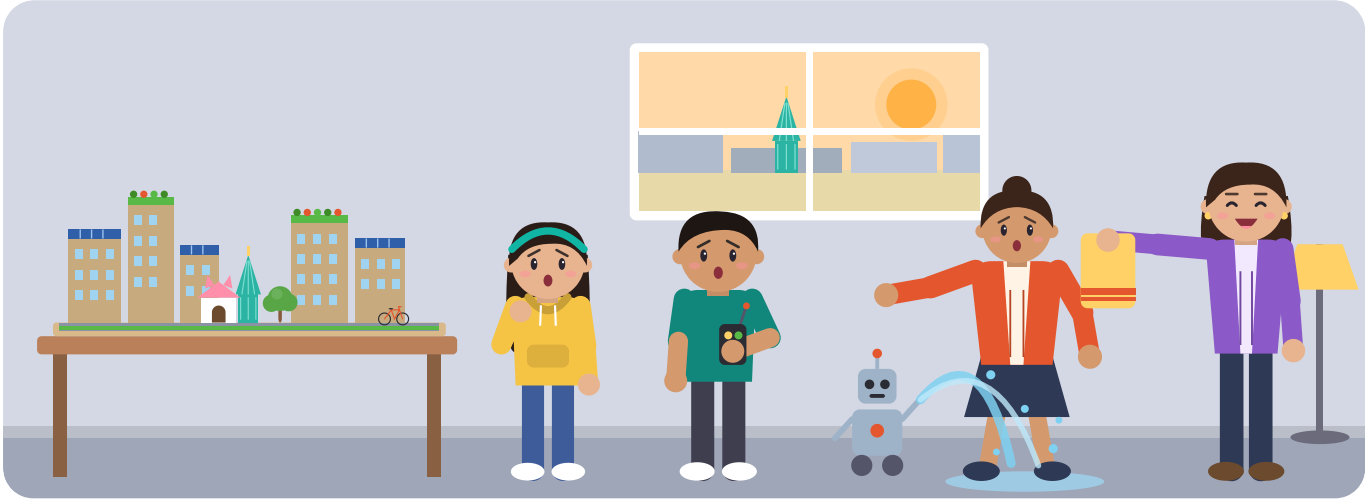

.....

.....

READING 4 COMIC-STRIP DIALOGUE ≈ 297 words · 3 min

Our City in 2070

Linked to: Student's Book pp. 134–135 & 137 – future life, smart houses and eco-cities

BEFORE YOU READ What will your city look like in fifty years? Think of three changes.

Young Space Explorers Weekend · Konya Science Centre · Team Workshop

Saturday at the Young Space Explorers workshop. Elif leads a team with two new Konya friends, Zeynep and Yusuf.

Elif OK, team! Our topic is "Our City in 2070". What are we going to build?

Yusuf Easy! **Flying** cars and a machine that does all our homework!

Zeynep Our teachers won't like that, Yusuf. They'll give us extra homework, won't they?

Yusuf OK. But I'm going to build a real **robot**. It will water the plants on the **roof farms**.

Elif I think Konya will be an **eco-city** in 2070. Every building will have **solar panels**, and people will drive **electric cars**.

Zeynep And bikes! People call Konya Türkiye's bicycle city, so there will be bike lanes everywhere. I'm going to make them from old shoe boxes!

Elif We'll use recycled things, won't we? We need to take care of our green planet. And all the buses will run on **solar power**.

Zeynep Konya is quite dry, so our city will collect rainwater. Then we won't **run out** of water in a **drought**.

Mustafa Let me help! I'm going to draw a **smart house** for Pamuk! The door will open when she says "Meow!"

Yusuf Great idea, Mustafa!

Later, Mum and Dad come to watch, and the workshop leader, Ms Erdem, arrives…

Ms Erdem Wonderful! How will people travel in your city?

Yusuf By bike, by electric bus and… watch this!

Yusuf presses a button. The robot rolls towards the roof farm… and waters Ms Erdem's shoes!

Yusuf Oh no! Sorry, Ms Erdem! It's going to need more work.

Ms Erdem (laughing) Don't worry. People who **invent** things make lots of mistakes first. Your **technology** gives us a glimpse of future living!

Elif We're going to win a prize, aren't we?

Mum Maybe! But first, here's a towel for Ms Erdem's shoes!

And yes, they won the "Green Future" prize! Pamuk's smart house was everyone's favourite part.

Let's check!

My score: _____ / 18

1 Choose the correct answer Circle a, b or c.

1 Where is Elif's team making its model?
(a) at Turunç Lower Secondary School (b) at the Young Space Explorers workshop
(c) at Uncle Cem's farm

2 What is Zeynep going to make the bike lanes from?
(a) old shoe boxes (b) solar panels (c) plastic bottles

3 What does Yusuf's robot do in front of Ms Erdem?
(a) It waters the plants. (b) It does Yusuf's homework.
(c) It waters Ms Erdem's shoes.

2 Answer the questions Write full answers.

a Why doesn't Yusuf build a homework machine?

.....

.....

b How will people travel in the team's city?

.....

.....

c Why will the team's city collect rainwater?

.....

.....

d What is Mustafa going to draw?

.....

.....

e Who gives Ms Erdem a towel?

.....

.....

3 **Complete the sentences** Use the words in the box. There is one extra word.

eco-city	solar panels	flying	run out	invent	robot

a In the future, maybe we will travel in _____ cars above the streets.

b Our school has _____ on the roof, so it makes electricity from the Sun.

c Turn off the tap! We don't want to _____ of water.

d In an _____, people use clean energy and plant lots of trees.

e Yusuf wants to _____ a machine that cleans his room.

4 **Put the events in order** Number the events 1–5.

a ☐ The robot waters Ms Erdem's shoes.

b ☐ Yusuf decides to build a robot for the roof farms.

c ☐ Elif's team wins the "Green Future" prize.

d ☐ Elif asks the team about their model.

e ☐ Mustafa offers to draw a smart house for Pamuk.

5 **Think & Share** Write your own answers.

a What will your city be like in 2070? Write three predictions with "will".

.....

.....

.....

b Which idea from the team's model do you like best? Why?

.....

.....

.....

CHECK YOURSELF

Answer Key

Reading 1 · The Night Mustafa Saw a UFO

(1) **True or False: a** F – It is outside the city. **b** T **c** F – She saw the rings of Saturn. **d** F – He says nobody knows yet. **e** T **f** F – Mum is in Konya with the family. Pamuk is staying with Maya in Antalya.

(2) **Choose the correct answer: 1** b) the Moon **2** c) the International Space Station **3** a) He wanted the astronauts to see it.

(3) **Answer the questions: a** They are there for the Young Space Explorers weekend at the Konya Science Centre. **b** It is composed of billions of stars. **c** He thought it was a UFO. **d** She is going to save her pocket money and buy a small telescope.

(4) **Word detective: a** telescope **b** bright **c** universe **d** astronauts

(5) **Think & Share:** Your own answers.

Reading 2 · Chasing the Weather: Meet Dr Kaya

(1) **Choose the correct answer: 1** a) She is a weather scientist. **2** b) the USA **3** b) the sound of lightning. **4** c) over warm seas

(2) **Answer the questions: a** They stayed at a safe distance and used cameras and computers. **b** Huge dark clouds grow very fast and the air feels hot and wet. **c** It is about two kilometres away. **d** Because the plain is dry and experts expect more droughts.

(3) **Complete the sentences: a** drought **b** blizzard **c** flood **d** lightning **e** tornado

(4) **Think & Share:** Your own answers.

Reading 3 · Türkiye Reaches for the Stars

(1) **True or False: a** T **b** F – He flew to space on a rocket from the USA. **c** F – It goes around the Earth about every hour and a half. **d** T **e** F – It is visible from the ground without a telescope. **f** F – He didn't go to the ISS. His spaceplane came back on the same day.
